Day 1 • HTML Basics

• What is HTML? → HyperText Markup Language (વેબસાઇટ નું કંકાલ / હાડપિંજર - Skeleton of a webpage)

Real-life: HTML is like the bricks and walls of a house 🏠

`<h1>Hello World</h1>` :- **Hello World** (big heading on screen)

Remember: Always close tags with </tagname>!

Mistake: Forgetting to close <p> or writing <h1> inside <head>.
